

COMPANY PROFILE

Decoration, Renovation, Facility Management
& Skilled Manpower Outsourcing.

Message from the Director

I would like to extend a very warm greeting, welcome & express my gratitude for spending your precious time to reading this profile. Even if it is going to a brief reading on your part. Since our founding, I have attempted to meet as many business owners, managers & HR executives so it grows our network. Business networking takes it on the level of personal selling and we could form a deeper relationship overtime. I held back from sending a salesperson to your office, opted out of advertising campaigns and prefer not to make cold calls. I personally prefer meetings to discuss your challenges and requirements so we can build a benefiting business case for your organization.

My personal aim with this company is to establish a mutual understanding & friendly relationship with other businesses, clients as well as my competitors. We are facing tough times, market saturation, new challenges and we all need to support one another to survive this economic bubble. Another aim was to integrate a website into our operations so you have all the resources, documentation and the ability to make performance reports and notify us of your grievances. "You cannot manage what you can't measure" as once said by notable pioneers like Peter F. Drucker who has written many books some of which I was fortunate to study during the time I pursued my M.B.A and mathematician William "Lord Kelvin" Thompson. We love complexity, we use dexterity & we love challenges. Something new that we had not done or heard of before is always welcome, when introduced something new and out of our scope we will study, analyze it and come back to it with an educated and better approach, perhaps hire new subject matter experts along the way.

Sincerely,

Mohammed Falah Khalid,

Founder & Managing Director

Hired Hands.
When you have too
much to accomplish in
too little time.

ABOUT US

The world is rapidly changing, and so is the Emirates; with the expo 2020 coming to the Emirates, we knew where we were headed. Old architecture, technology and engineering is getting out dated and new buildings and interiors will have to be ready to interface with the smart technology of the future. The pioneers have conceptualized the future for many years hence; it has now become an obsession of our generation. Smart buildings, futuristic interiors, connected homes and offices, domestic and enterprise robotics, meticulously packed interiors in the age of ever-rising real estate prices are all bequeathing a radical change in the way we build. Hired Hands Technical Services was established with the same passion that acts as a catalyst to transform the Emirates for the future.

Firstly, we have integrated technology in our operations in a manner that reduces the need for human-to-human interaction even during unofficial hours; therefore, you will not depend on our action or wait for a meeting, consuming valuable time and energy that could benefit with your attention somewhere else. Our website will handle your Inquiries for quotes, resources such as ID and other documentation, performance reports, feedback and meeting schedules.

Secondly, not only do we undertake the project directly we also have experienced and qualified workers that we are willing to outsource for an agreed period. Our men selected on certified skill from approved test centers; understand your instructions and are capable enough to perform the given tasks from their WBS Dictionaries without any hindrance.

Our focus is on safety, efficiency, sustainability, competitive prices and friendly work atmosphere. Not only do we execute your desired interior designs for residential and commercial buildings, we also do lobbies, restaurants, showrooms, shopping centers, factories, workshops, garages and collector's rooms. What we bring to the table is staff with years of experience, a diverse workforce, enthusiasm, attention to detail and always willing to learn and explore new things. We will never say no to an offer, we will never hold back in exploring new opportunities. Helping you achieve your objectives is our main concern, we want to build long-term relationship with you either you are a developer, contractor or are property owner, discuss your plans with us today and we will be there at your site tomorrow!

When you are particular with the look of your interior.

Our Mission

- To offer creative and innovative design and engineering solutions which are supported by an experienced and professional team that values professional service delivery.
- To deliver excellent services aimed at minimizing the utilization of resources.
- To create a dynamic work environment which offers unparalleled growth opportunities for our employees.

Our Vision

To become the best engineering and building transformational service provider in the United Arab Emirates, offering world-class expertise and high-quality services which are affordable, efficient and timely.

Core Values

Our core values have been the founding values since the first days.

- Providing Dexterous, friendly and dedicated service to all our clients.
- No hidden fees and costs unless discussed prior to agreement.
- Hiring of diverse personnel and unbiased fair treatment of all employees.
- Equal pay for equal work.
- Minimizing wastage of clients resources especially materials, tools and hardware.
- Having our fair share of corporate social responsibility.
- Quick communication, feedback and early completion of our formalities with due diligence.

WHAT WE DO

1. MEP CONTRACTING

Hired Hands Technical Services is licensed in MEP contracting for small scale to big scale projects, our workers are certified, trained with years of experience lead by the engineers and foreman will help your project reach completion within the estimated deadline as intended. We undertake challenging projects that allow us continuously enhance our competencies. We wire organized electrical grids instead of a nest of wires following a standardized color pattern, we use professional wire stripping and crimping tools and safety equipment to ensure the electrical connection doesn't fail before the end of life of the building. When fixing circuit breakers and electrical components, our priority is the safety of the tenants rather than just cutting our costs that can be dangerous or lethal.

Our HVAC works focuses on air conditioning and ducting for many different types of facilities, including troubleshooting, replacement and maintenance, HVAC fire dampers, and fire suppression plumbing. Keeping the interiors cool, warm or pulling toxic air out of your facilities, you can always count on us to do the job as intended it to be.

We do everything from supply of water to drainage system, including the boilers. Our men come equipped with basic handy tools that allow them to do their job independently, they are as stated certified and hold relevant experience in their fields to do their job properly. There wouldn't be reduction in water pressure, or clogging of drainage for years to come if sanitation system is used as correctly intended.

HVAC Mechanical Services

Enclosed residential and commercial buildings are challenged with moving mass particles of air, especially in the scorching heat of the Gulf where summers become unbearable with humid weather. The Ventilation and the Cooling system then is challenged with isolating dust particles, mold, microbial infections, spread of air borne diseases while keeping the temperatures cool without unnecessarily burdening the electrical grid. Studies have shown that offices with HVAC systems are linked to symptoms in the occupants (Mendell et. Al ., 2008), HVAC is also an important factor in student performance, because the right temperature played a key role in the ability to learn (Wargoeki.P, and Wyon.D. 2006). Hired Hands Technical Services as a contractor considers itself fortunate enough since given the opportunity to be the future technicians of the Emirates. Not only are we eager to take on HVAC projects alone, we also are more than happy to outsource our staff to work on your projects under your supervision and control. Our core values include Corporate Social Responsibilities since the day of the inception, mail us your inquiries with any projects for non-profit organizations or labor for future research that aim at reducing the CO2 emissions, electrical consumption and haphazard on health etc., we will ensure that we give a selected number of hours to your cause too.

Plumbing Services

Plumbing is one of those things that we take for granted until something goes wrong. Aside from pipes, toilets, and sinks, there is a lot more to plumbing than meets the eye. Thus, it takes a good bit of training and experience to become a master plumber. From supply, drainage to water heater repairs, sanitation and flood drainage services, hired hands technical services has trained plumbers who rely on industry standard techniques, including trench-less sewer repair as well as use of modern hardware in order to offer you superior plumbing services.

Electrical Services

Apart from Gas leaks the leading causes of fire can be attributed to electricals, many contractors often compromise the long term safety for cheap profit that results in regretful damage to life and property, especially in the scorching heat of the summer. Loose connections, improperly stripped, crimped and joined wires, substandard quality breakers, cheap electrical switches and outlets would only add spark to the fuel. We want to do it right in the first time, eliminating regretful hours stripping down and troubleshooting once the calamity has struck in the first place, our electricians come equipped with essential bare minimum tools and hardware to ensure the job completes with maximum accuracy.

A person wearing a white lab coat and dark pants is pushing a yellow motorized floor cleaning machine. The machine has a black handle, a water tank, and a cleaning head. The person is walking on a tiled floor. The background shows a metal railing and a building.

**Setting the
vision of 2020
into motion.**

2. Interior Designs and Renovation

Licensed to provide almost every possible activity in the technical services sector, you will not have to negotiate, arbitrate with multiple contractors in the same room causing mass misunderstandings and miscommunications. Best of it all we use Project Time management to complete each activity one after the other using network diagrams following PMI guidelines. Our range of activities allows us to complete the following activities:

- a. HVAC Installations
- b. Electricals
- c. Plumbing
- d. Painting and Wallpapers
- e. False ceilings and Partitions
- f. Tiling on walls and Floors
- g. Furniture, Carpentry and Flooring
- h. Cladding
- i. Ornaments
- j. Engravings

Either approached by a developer, contractor, building owner or an interior designer, our work shall be meticulous,

with a packaged with science and art. While we are at it, we would like to remind we are extremely thrilled and ecstatic to build the smart homes and workspaces of the future.

3. Facility Management

We are your support when maintaining your facility working at full pace throughout the year, at least partially to what we are capable of. You can leave the job to us to keep your Air Conditioning cool all year round, your water supply system will be replaced as soon as it has leaked, clogged or it needs to have excess air bled thru the plumbing we even fix water heaters and other water facilities like swimming pool, Jacuzzi .

We can also move your false partitions based on your revisions and needs, cleaning and sanitation of your facility also requires your attention; you don't just need to have floors swept and scrubbed toilets, the particles lingering around in your building need to be removed as well or they will be the reason behind respiratory and airborne diseases. Send us an inquiry and we will develop a facility management plan for you, it can also be part time and scheduled for a limited number of hours per week to ensure you get the best Facility Management at an economical cost.

MANPOWER SUPPLY FOR THE RELEVANT FIELDS

HVAC Technicians

We supply skilled AC technicians to those in need of extra hands. If you are considering hiring outsourced staff for your projects, you do not need a justification as to why hiring extra men will benefit your project in the short run, chances are you have secured an enormous project already, this is the most financially viable decision especially if outsourced for a short period. It is a win-win for both our technicians and your project, and your balance sheet will look pretty to the shareholders too.

Electricians

Unlike other skilled categories, electrical work requires in-depth knowledge, patience and use of the correct tools. We understand your business need therefore; we have vowed to hire electricians with relevant experience and certification if ever. Let us know what type of electrical work you have in your scope so we ensure you get the personnel with the right skill level, if we do not have one we will bring a new recruit from overseas in as little time as possible.

Plumber

Plumbing will require a level of problem solving and dexterity in order to ensure the right balance of torque and fragility. Our plumbers will be able to do most jobs delegated, as they are selected based on skills & qualification, they also have a good understanding of working on different types of plumbing jobs in a building.

Carpenters

Our carpenters are going to be indispensable in wood furniture manufacture, wood shaping (curving and shaping), joinery, interior furniture and decorative aesthetics of a designed interior. They also are capable of installing wooden flooring and replacement of rags and carpets on a large scale.

Tile fitters

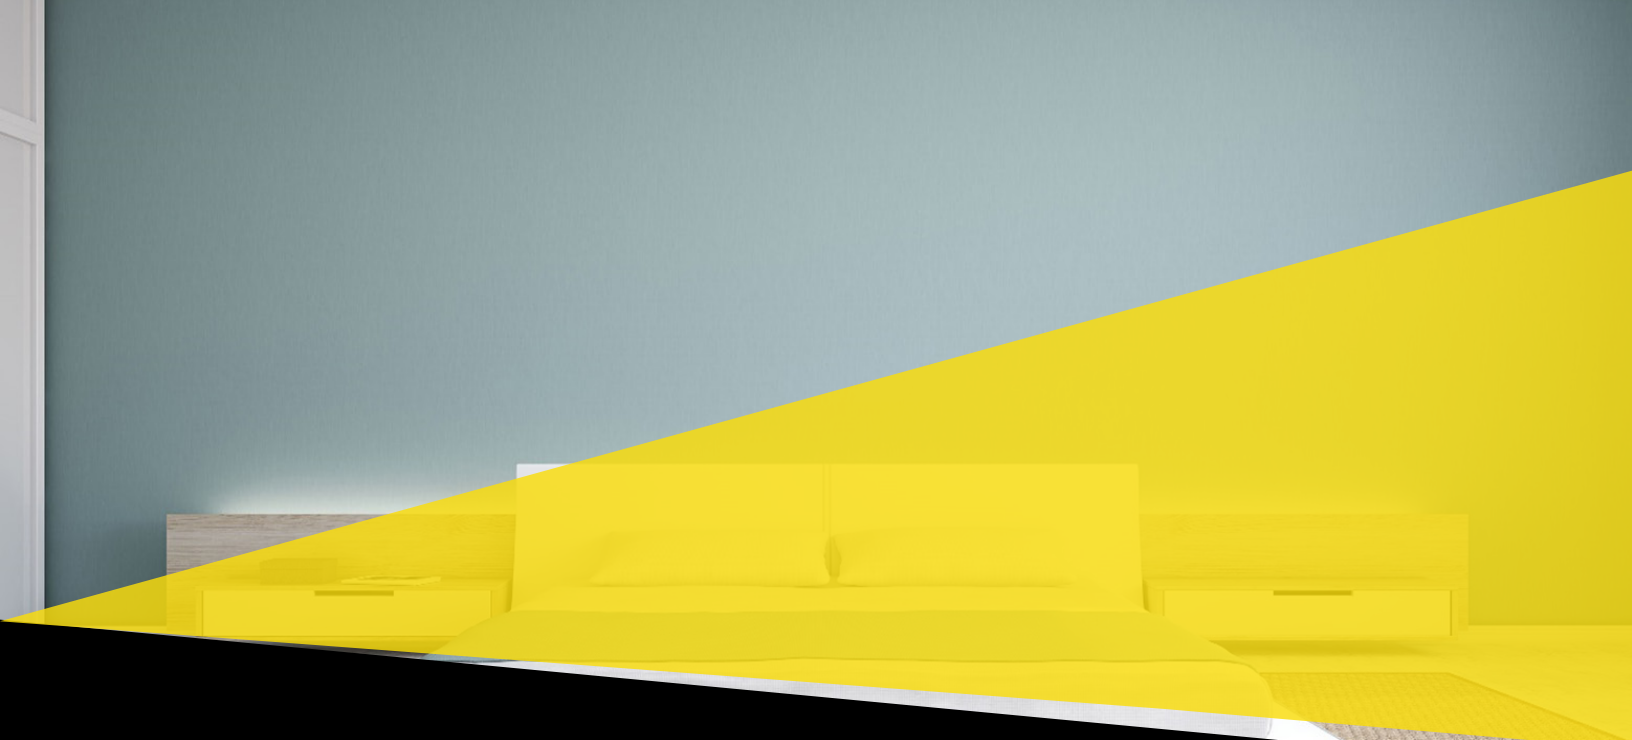

We have tile fitters that will be of good use especially when you have a large building, a shopping complex or a big house to complete in a given period. All of them will treat your project as ours; in fact, we will brief and instruct our workers to minimize wastage, measure twice & cut once, plan before starting and ensure the tiles are equally spaced and leveled when fixed. Especially in dead give areas such as corners and near the basement of the sink.

Painters and Wallpaper fixers

Our painters ensure that the paint is blended and applied as instructed; it is our duty that a job, under your supervision completes with minimum wastage, lower consumables and optimum number of walls be completed with a given barrel of paint or rolls of wallpaper.

Cladding

We believe this is tedious work and most of it be done from the outside of a building where it is done on a scaffolding, therefore we have hired healthy and skillful workers that have worked with many types of materials on different types of buildings. They fully understand the challenges and the solutions to deal with.

False Ceilings and Partitions

In Interior decoration and big facilities use of false ceilings and partitions plays an important role, either be it decorative or increasing the number of rooms in a floor, our artisans have worked in various buildings with varied experience. We anticipate seeing you benefit from our talent in upcoming projects.

Plasterers & Engravers

We have general wall pre paint plasterers and are very keen to reintroduce Plasterers and Engravers to bring a centuries old tradition back to mainstream in the gulf, although engraving is visible on almost every historical building in Europe and their ex colonies, it hasn't getting much attention even in newly constructed mosques compared to the past.

Ornament Fitters

Most ornament installations usually require fragile handling or careful installation in order not to break or damage either during installation or in extreme weather. Since people prefer to display them outdoors and we just do not want to give up them yet, engraving and ornaments have been a sign of civilization for centuries. We know this is niche territory, but does not hurt to mention we are willing to do it

Cleaners

We have cleaning staff that would keep your building looking new and shiny even after several years of inauguration, the best part; since they are outsourced and we did not have to buy any cleaning agents or machinery the monthly billing is far more affordable in your operating costs. They can also be scheduled to work a limited hours on a daily basis for a more friendly billing.

General Helpers : We provide general helpers to work and assist in their site and workstations

WHY CHOOSE US

Experience and Expertise

Hired Hands Technical Services leverages its experience and expertise in the industry to deliver exclusive and exceptional services. We have acquired the knowledge and expertise needed to deliver exactly what our clients want and even exceed their imagination.

Innovative ideas

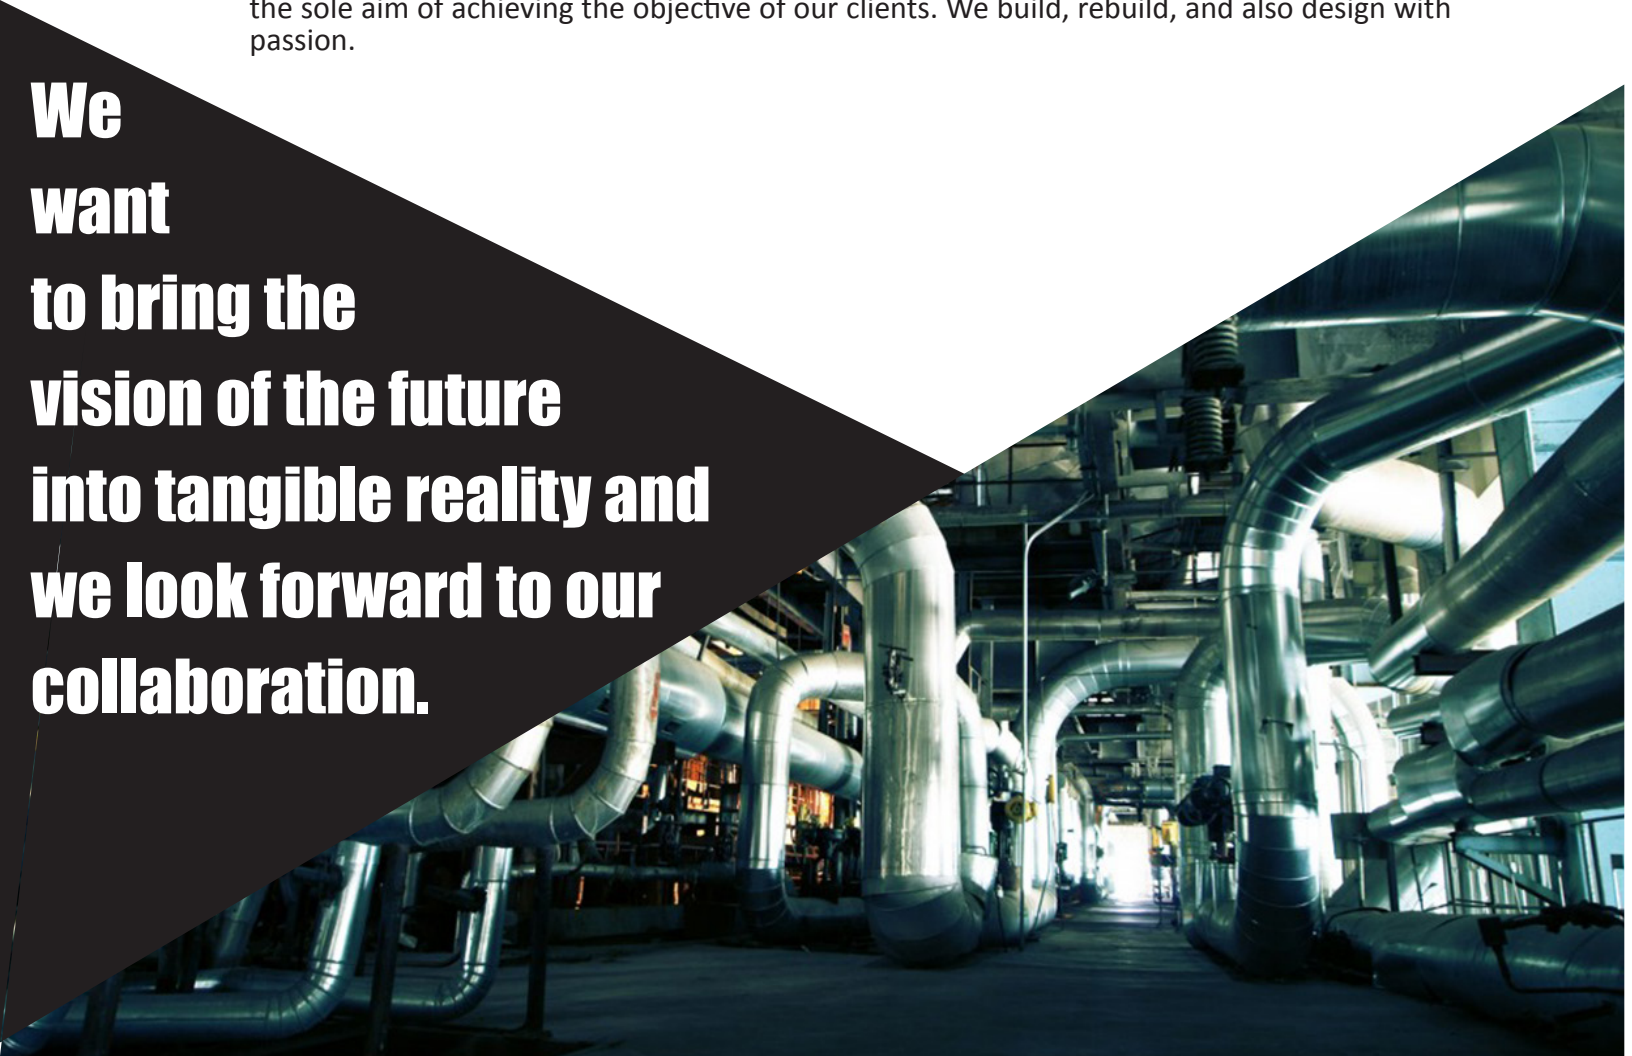

Hired Hands Technical Services possess the ability to creatively transform an existing design into a whole new design. We passionately tweak our clients existing designs into sites to behold. Our manpower possesses the creativity needed to bring your dream into reality.

Quality

At Hired Hands Technical Services, we consistently deliver high-quality creative solutions with the sole aim of achieving the objective of our clients. We build, rebuild, and also design with passion.

**We
want
to bring the
vision of the future
into tangible reality and
we look forward to our
collaboration.**
